

POWERFUL

THE ORIGIN INTERNATIONAL FERTILITY CENTRE

to childless couples and their families since 2008. Within a short span of time, the centre has earned an 'International Status' and is regarded as one of the best IVF centres in India.

ABODE OF EXCELLENCE

Being one of the largest super-specialty centres for fertility and endoscopic surgery in India, The Origin International Fertility Centre is a repository of excellence for the treatment of infertility and related problems. Fully equipped with computerized state-of-the-art equipment and compliant with European standards and ICMR guidelines, the centre ensures that every aspect of its clients' requirements is catered to without causing them any inconvenience.

Located in the sprawling suburb of Thane near Mumbai and spread over 6,000 sq ft across three floors, with a panel of top-notch American and British experts, The Origin International Fertility Centre is equipped with state-of-the-art facilities, operation theaters, ultrasound rooms and high-security laboratories, with all its equipment imported from the UK, the US and Europe. A testament of its immense popularity is the fact that patients suffering from infertility problems are traveling to Thane from all over India, UK, USA, the Middle East and far eastern regions.

ORIGINATING LIFE, SPREADING HAPPINESS

Children are the gift of God and their existence is associated with the spread of happiness in their families in particular and the society in general. On the other hand, the lives of childless couples remain hovered in gloom owing to their infertility which leads to dejection, stress and depression unless they come across messiahs like Dr Sandeep Mane. Dr Mane is not only an internationally experienced infertility specialist but is also an equally empathetic soul who lays due stress on the psychological counseling of such couples prior to initiating their treatment.

Under the quintessential leadership of Dr Mane – who has revolutionized the healthcare sector through his exemplary work in Assisted Reproduction and has effectively provided life-changing treatments to thousands of couples dealing with varied health & infertility issues as a renowned laparoscopic surgeon – The Origin International Fertility Centre has been bringing joys

FOUNDATION FOR FUTURE

The Origin Foundation is built on the premise of Dr Sandeep Mane's noble intentions of spreading happiness which according to him lies in giving back to the society. Stressing upon the fact that the ultimate happiness lies in sharing with each other the resources in the form of money, knowledge, skills, experience and other amenities, Dr Mane vehemently believes that each person is capable of contributing to the society.

Involved in charitable work for women's health over the years, The Origin International Fertility Centre has been working closely with the Rotary Club of Thane Lake City to organize various health events and has also been conducting training programs for the trainees in the field of medicine, thus equipping young resident doctors with the ability to communicate well with patients and improve the doctor-patient relationship. The Origin Foundation continues to serve the society by aiming to focus on the main areas of health, education and art and plans to work for the education of young children as it is concerned about the future of youngsters, as many of these get distracted and are unable to acquire qualities required to become good citizens.
