

NOVA IVI FERTILITY

COMPASSIONATE PARTNERS FOR YOUR HAPPINESS

One of the most recognized and successful fertility centers of India, Nova IVI Fertility Centre continues to march on a successful embargo fulfilling the aspirations of thousands of childless couples to give them their most priceless moments

Nova IVI Fertility understands the insights of a couple aspiring to have a child and therefore they are not just empathetic and compassionate in their approach but their genuine transparency in pricing and their straight forward description of the procedures give them an edge as compared to the other fertility centres.

CUDDLING JOY

Their consistent growth from their first centre in Ahmedabad to their presence in almost all the major cities of India signifies their persistency in serving standardized and high-class treatments reposed with core ethos and infused with the basic compassion to bring joy to the patients laced with satisfaction and safety.

Being abreast with the latest global fertility treatments remains their success mantra for growth and their partnership with IVI Spain, the most advanced Reproductive Assisted Technology of the world, has had a remarkable positive result in providing the latest IVF services and technology and an overall improvement in the software, training, and quality management. The constant commitment to keep serving the society with the latest technology remains their unique edifice for bringing happiness to thousands of anxious waiting to be parents with additional state-of-the-art technologies such as vitrification for preserving embryos and eggs, embryoscope and ERA to find out the timing of the uterus capacity to accept embryos.

The procedure of IVF- ICSI is a breakthrough in the infertility research which significantly increases the chances of pregnancy in those women who have had multiple pregnancy failures in the past. NIF with their passion for technological improvements in the fertility arena offers another copious advanced technique known as IMSI (Intracytoplasmic morphologically

selected sperm injection).

This technology is a higher improvement of ICSI (Intracytoplasmic sperm injection), where an extremely high powered microscope is used to select the sperm cells with best morphological quality for carrying out the fertilization of the oocytes (egg) and hence improving the chances of fertility. These milestones, along with their superior services, and the best professionals to guide the couples rightly, make this journey to parenthood full of hopes and happiness.

PROVIDERS OF ULTIMATE HAPPINESS

The experienced and expert team of the founders, directors, and specialized team of doctors makes NIF the market leaders and the first choice for Fertility Services in India. Their ethical values, positive work environment, best-in-class IVF treatment, innovative protocols to increase the success rate and customer experience, coupled with integrity, trust and respect makes them the cradle of bountifulness to all their clients.

For their excellent contribution towards

a noble cause of infertility treatments, Dr. Manish Banker, Medical Director of Nova IVI Fertility, has been awarded variously, including selection for the prestigious Dr. B.C. Roy National Award. The award was presented by the Honourable President of India in August 2018.
